2022-2023
SRC ELECTIONS
Who is Brendon Murira?

I am a second year student studying Medical Laboratory Sciences. I will be running for the post of SRC President in the 2022-2023 SRC Elections.

Why Me?

The main agenda that I have for the Students at Africa University is to introduce the type of a leadership that would be able to advocate, listen and stand for the Students in order to deliver an improved social and academic life at AU.

"Trust me to transform the relationship between AU Students Union, Colleges and the University. With my experience as a Community President, I'll scale-up my college campaign to work for all, enhancing equality of experience is my goal."

What pushed me to go for Presidency?

'As an AU student, I have noted that the type of student leadership (SRC) that we have at Africa university exercises management (representing the AU BOARD) and not leadership, hence not representing the Students body effectively.'
MAIN OBJECTIVES

1. Business and Entrepreneurship.
   - Establishment of a Market Day to support students running small-medium businesses.
   - Introduce a yearly business Forum that will help students engage in entrepreneurship through hosting webinars.
   - Advocate for students with registered businesses that supply meat, vegetables, to be given tenders by the AU dining hall to supply products that may be needed in the DH hence supporting Students businesses.

2. Academics
   - Advocate for curriculum review on all students' programs since most of the courses we are studying are out dated.
   - Advocate for permanent lecturers in the University who will be available to teach students on time and avoid last minute classes that will affect students' results.
   - Advocate for Academic and Outreach trips for students to visit real time work places e.g., Students in the Health Department and Natural Sciences in order to gain practical knowledge in what transpires in their field of study.
3. Social Life and Mental Health

- Establish a student program that is led by the students in the college of CSSTHE to host monthly campaigns on mental and sexual health. (Social Work & Psychology).
- Partner with AU clinic
- Introduce a Students (support packs) program that help some students on full scholarship who are in need for essential/basic needs in the school/advocate for the review of the toothpaste program for it to consider some students on full scholarships.
- Advocate through the office of Social Welfare to represent students to the AU Dining Hall in order to consider employing at least two qualified senior chefs who can improve food quality at the Dining Hall.

4. Legal Affairs

* Establish a students' 'REPORT AND SUPPORT' program to empower victims of hate crime and cyber bullying.

5. Input and Feedback

- Setup a Students suggestion Box on Campus and (online platform) for students to drop off their suggestions, inputs & feedback to help enhance development and service delivery e.g food services, academic and social services.
6. Ubuntu and Diversity

- In order to increase national and international students interaction, and apart from having community events, I will embrace the INTER-COLLEGE SPORTING DAY for it is a great initiative that allows students from various nationalities to participate in a diversified manner hence strengthening unity among all AU students.
- Introduce an inclusive REVIVAL Day/s once per semester that will bring all communities at AU to engage in praise, worship and preaching on Campus. This will be a great opportunity for students in the Department of Theology to have a great experience and hence making this event a success.

7. Students Empowerment and Engagement

- I intent to establish an Arts and Culture exhibition and Talent Show Day that will take place once per year.
- Students from various Communities will engage and showcase various cultural and arts products and certificates can be issued that can enhance students' CVs when applying for jobs, and this will also be a great opportunity for AU Clubs to showcase their various activities.
- Empower students from various communities to venture in small agricultural projects like vegetable farming especially students in the department of Agriculture who easily have an access to the AU farm, and this can help to boost their practical skills.
- My administration will work to set up the small projects and the products can be donated to our surrounding communities hence cementing the relationship between AU and surrounding communities.
8. Accessibility and Availability

- I will work with my administration to introduce MUKURU & WorldRemit Booth on campus that will allow students to get money easily and this will be run by selected students from the Business Department.

- I will work with my administration to increase variety of products in the tuck-shop that will allow students to access all their basic needs on Campus.

- Also, I will also make sure that the products in the tuck-shop suit University students and I will facilitate to conduct surveys to gather students' suggestions on products they would want to see available in the tuck-shop.

- Introducing a cash register machine in the tuck-shop that will increase cash security and hence deliver proper book keeping.
