# PROFILE

- 
- Name : Silethubuhle Moyo
  - Program : International Relations
  - College : Social Sciences Theology Humanities and Education
  - Year : 1.2
  - CHP : Asia Africa United Nations Ambassador

VIEWS

- 
- I believe that students should have access to high quality education supported by resources that assist them intellectually , emotionally and promote social development.
  - Students deserve access to extra ordinary education that includes excellent college organization, academic technology and other resources that promote an improved academic system .
  - Moreover , students have the right to expect prompt and courteous responses from university academics as well as administration concerning their education and policies that make up the academic system.
  - With my involvement in the SRC I aspire to bring about Africa University's education to the twenty first century inline with the technological boom the global society is embracing.
  - I aspire to promote a Comfortable , Affordable, Technologically advanced **CAT** in the legal and academic sector.

# Policies

➤ Deans list recognition

➤ Academic practical opportunities

➤ Promote open door policy

➤ Promote student academic policies accommodating the pandemic

# PROMOTE DEAN'S LIST RECOGNITION

- The dean's list honour is an achievement meant to motivate students to strive for higher grades and work hard towards a Summa Cum Laude.
- Thus as part of motivation, I believe the institution should go beyond certificate mention as recognition.
- I aspire to implement a solid policy that honours the deans list through incentives as we as technological equipment as motivation for students to continue working harder.
- Recognition will also be in opportunity means, specifically students who excel in their academics.

# ACADEMIC PRACTICAL OPPORTUNITIES

- Students should not only be limited to theoretical work and exposed to practical only on attachment.
- I believe an educational institution should offer grooming opportunities where students are able to learn and practice in preparation for their field work.
- I will bring in organizations in line with courses offered in the institution as a way of implementing practical learning.
- My exposure in the Asia Africa UN forum has seen me grow my network which now includes individuals, organizations within the African region and in the global society. Thus allowing me to create relationships with other academic forums from different regions for the benefit of the student academics.
- I will also advocate for vocational jobs for students in promoting practical work.

# PROMOTING AN OPEN DOOR POLICY

- The student body has the right to voice out matter affecting their interest in academic and legal pursuit.
- They also have a right to quick and student friendly services thus in response and general action.
- I aspire to promote and improve communication between students and the administration concerning student academic affairs.
- This will be done through creation of a student speed dial line **‘a digital suggestion box’** which will be a student-friendly dial for individuals with concerns and complaints. Moreover I assure improved action in dealing with students queries.

# PROMOTE STUDENT ACADEMIC POLICIES ACCOMMODATING THE PANDEMIC.

- The Corona Virus has seen a complete turn in the academic sector which has made it hard for students to adapt from the usual -face to face -learning to online.
- Despite technology advancement, online learning has become a costly expense for most members of the student body who face data and electricity challenges that have affected academic reports.
- I will advocate for an improvement in student policies that's :
  - i. Leniency on class attendance considering the technological issues faced by students
  - ii. Upload of academic material on more accessible platforms in consideration of data costs
  - iii. Fair and comfortable lecture time tables.
- A continuation of the data aid policy.

With your assistance, I aim to implement the policies I listed above and advocate for the academic and legal well being of students. With your votes we can make Africa University a Comfortable , Affordable, Technologically advanced academic institution catering for every student.
