

Alexander's Manifesto

Alexander

Biography

- **About me**

Am by names Alexander Sembera a 2.2 student in the college of CSSTHE, Bachelor of Divinity and am contesting for the post of finance secretary 2021. Furthermore, I am an honest, focused and passionate man as well as trustworthy being and I actually love teamwork for better efficiency of work.

- **Background and experience**

As Alexander I have actually worked with **Iftra Uganda Limited** as a sales and most importantly on the post am contesting for, I have actually worked with the tuck-shop for over 8 months working on the basics of this office since am one of those people who are convinced that experience is the best teacher implying I stand to be the most eligible candidate for this post.

- **Main agenda**

Enhancing efficiency and consistent service delivery to the students.

Detail of the manifesto

- **Transparency.** I want to make sure there is clear monitoring of the money made in the tuck-shop plus all the expenses incurred along. This is to be done by coming up with weekly ledgers and reports to make sure the money of the shop is put at proper use and actually for everyone to be sure where their money goes.
 - **Students' offer day.** In favor of the Africa University Students I want to make sure I create a students' offer day where prices are dropped for students for some goods. This will be achieved by constant supply of a wide scope of goods
 - **To set an index of goods aside to be supplied by students.** Being it that the tuck-shop is meant to benefit the students of Africa University, then I will make sure there are a set of goods that are to be supplied by capable students accordingly at a favorable tax rate.
 - **Improve on the customer care services.** I actually want to setup a suggestion box at the shop to make sure students are able to easily present their complaints of how the shop could working or even the goods they want that I can easily settle them that is if you trust me with the office.
 - **Credit facilities for students.** I want to put in place credit facilities where students can easily borrow some funds from the shop with specified time of returning the money. This actually because am actually convinced that the shop is meant to improve and help students of Africa University. However, to be clearer about this, this credit facility is to be covered by the profits of the shop but not rather from the sales that is to prevent the uncertainties
 - **Set favorable prices of goods in the shop.** I want to stabilize the prices of the goods in the shop to make sure they are pretty affordable to the students. This is actually manageable in a by reducing the costs and expenses on unnecessary projects.
 - **Deal with the shortage problem.** I want to make sure the shop should not run low of supplies of products especially the eatable goods like bread, pies among others. This is basically because these are basic foods to the students of Africa University and therefore if you trust me with this office I want to dedicate my time to total filling of the shop without running short
- In conclusion,** your vote actually determines your well being at Africa University and that is if you vote for the right person "Sembera Alexander" to this office.
